

ENCLOSURES DESIGNED FOR THE WORLD'S WATER SYSTEMS™

Specification Submittal Sheet Backdraft Damper Insulated Enclosure Accessory

Materials

16-gauge Extruded Aluminum Frame, Aluminum Blades, Galvanized Steel Tie Rods and Stainless Steel Hardware

Description

This model is a rear flanged gravity supply (intake) wall shutter. The frame and blades are mill finish aluminum with a galvanized reinforcement strip on each blade for added strength and counter balancing efficiency. The blades have a felt seal on the leading edge for quiet closing and better protection from the weather.

Recommended for vertical mount supply (intake) only. The blades will pivot at the bottom and fall with gravity to open. Spring-assist to close.

Specifications

- Type Wall Mount, Supply
- Damper Size (In.)..... 12 x 12
- Overall Size (In.) 14-3/4 x 14-3/4
- Flange Width (In.)..... 1 3/8
- Max. Velocity (FPM)2,000
- Includes.....Felted Edges for Quiet Operation
